ENVIRONMENTAL POLICY

At Predl, our Environmental policy and our environmentally friendly products are the foundation of our environmental programs. The policy communicates our focus and continued commitment to protect the environment and ensure we conduct our operations using sound EMS practices by:

- Establishing context and interested parties, aspects, risks and opportunities related to the manufacturing of concrete protective liners;
- Being an environmentally responsible neighbor in the communities, we operate;
- Continually improving our activities with a focus on “prevention of pollution” by reduction of impact of significant aspects through control programs;
- Setting environmental objectives and targets and practicing conservation to promote sustainability in all areas of our business including products; and
- Commitment to continual improvement of the environmental management system to enhance environmental performance.
